

**Looking for reliability,
quality and value in the
medical industry?**

At Vlier, it's standard operating procedure.

Some medical applications of our products include the following:

Knurled knob plungers can be found in back braces and knee braces used after procedures and trauma.

Ball detent pins are used in braking mechanisms found in common diagnostic equipment.

Leveling mounts provide stability to oncology treatment delivery systems.

You can count on us for reliability and stability—in doctor's offices, hospitals, clinics, surgical centers and emergency rooms across the country and globe.

We design all of our products with advanced technologies, precision engineering and obsessive quality control. Why? Because lives depend on it.
